Q1 Full Name

Larry Bender

Q2 Agency

Respondent skipped this question

Q3 Address

1925 Andre Ave. Los Osos Ca. 93402

Q4 Email

pagebender@msn.com

Q5 Overall Opinion (DWR's Draft Decision on Boundary Modification Request)

Oppose

Q6 Which basin does your comment apply to?

3-008 LOS OSOS
VALLEY

Q7 Provide comment here:

both basins feed into Morro Bay and are very important for the health of the bay, they are to close to each other and it is to simple to say that one does not effect the other over the long term. The BMC is just getting the part of the basin under the town stabilized and they are already planing on drilling new wells in town that will effect the lower aquifer that extends to the boundary of the division they are requesting.

this division is based on modeling and could have some errors that may not show up for years. Let the sub-basin be stabilized and the seawater intrusion truly be under control and the health of the bay be restored before any division of the Los Osos Aquifer is allowed to happen.
